

Earn Big Money!

“Tired of slaving away at a job you hate? Want to earn big money? Then become a brain surgeon! Call the Dinklaker Academy of Craniological Arts *now!*” The insistent ad pushed all of the right buttons in Jerome, who did indeed telephone the number on his TV screen. A scant three weeks later, he was already preparing to operate on his first “patient.” But don’t worry. It was only a mannequin. Academy students didn’t get to work on live humans until the fifth week of training. Sometimes the sixth. Still, it was important to get the hang of the brain surgeon’s tools of the trade as soon as possible. So Jerome picked up his Sears Craftsman N2610, found that sweet spot between the isthmus of the thyroid gland and the Adam’s apple, and carefully began to saw. It felt ... *obbbbh*, so *good!*
